ADDENDUM I

SCOPE OF WORK

1. GENERAL

The purpose of this contract is to provide monitoring services of debris removal projects in the territory of the United States Virgin Islands which have been declared a disaster area by the Governor of the United States Virgin Islands.

The Monitoring company shall provide all equipment and tools necessary to monitor progress on debris removal projects. The quantity of Debris Monitors shall be determined by DPW. Work shall provide all equipment and tools necessary to monitor progress on debris removal projects. Work shall commence within twelve (12) hours of receipt of a job order. Work shall be performed in the United States Virgin Islands. Work shall be performed according to schedule established by DPW until all job orders are satisfactorily done.

The Contractor shall monitor work environments and procedures to ensure the safety of the public and government personnel and property exposed to debris removal operations and activities.

2. EXECUTION

The Monitoring company shall coordinate all work through the Department of Public Works. Debris removal activities shall consist of cleaning and removing any and all "eligible" debris from the public grounds and public right-of-way (ROW) of streets and roads, as directed by the Contracting Officer's Representative (COR). The public right of way is defined for the purposes of this contract as the area within fifteen feet from the edge of pavement or the area up to a permanent barrier such as retaining a wall. Debris removal work will include 1) examining debris to determine whether or not debris is eligible; 2) mulching biodegradable woody debris located on the federal-aid-highways and public grounds; 4) hauling all non-hazardous debris to an approved dumpsite; and 5) dumping the debris at the dumpsite. Ineligible debris will not be loaded, hauled or dumped under this contract.

Debris removal shall include all eligible debris found on the ROW within the area designated by the COR. The COR may specify any eligible debris within the ROW which should not be removed, or which should be removed at a later time. The Contractor shall make as many passes through the designated work area to another designated work area without prior approval from the COR. Any eligible debris, such as fallen trees, which extends onto the ROW from the private property shall be cut at the point where it enters the ROW, and that part of the debris which lies within the ROW shall be removed. The Contractor shall not enter onto private property during performance of this contract.

The Contractor shall conduct the work so as not to interfere with the disaster response and recovery activities of federal and local governments or agencies, or of any public entities. All work shall be accomplished in a safe manner.

3. LOAD TICKETS

"Load tickets" will be used for recording volumes of debris removal. Each ticket will contain the following information:

- D. Date
- E. Site Departure Time
- F. Site Monitor Name
- G. Dump Arrival Time
- H. Dump Arrival Name
- I. Debris Classification
- J. Debris Quantity in cubic yards
- K. Vehicle Tag Number

It is the responsibility of the Debris Monitor to issue "load tickets" at the debris removal site prior to departure from the loading site. The Debris Monitor will keep one copy of the ticket and give two copies to the vehicle operator. Upon arrival at the dumpsite, the vehicle operator will give the two copies to another Debris Monitor at the dumpsite. The Debris Monitor will validate the ticket, retain one copy and give one copy to driver for the Contractor's records.

The Debris Monitor must ensure that dump trucks depart from the debris site with a full load of separated debris covered in a manner to prevent dumping debris on the roadway.
