Questions and Answers:

Question:

Please provide the number of vehicles to be monitored for this implementation. The Volume Pricing indicates 1-50 vehicles and 50-100 vehicles per pg 12 (under Cost Proposal) of the solicitation. It was our understanding that the fleet was substantially larger and that plans were to monitor between 1000-1500 vehicles.

Answer:

We currently do not know the exact number of vehicles that will be monitored but base on the different packages amount we can make an inform decision. We currently have about 1400 vehicles in the fleet which include heavy and specialize equipment which would not be monitored. The reason for the different package is to see the variation in package prices
