All contract bid terms must include the cost of laborers, operators, supervision, maintenance, fuel, repairs, overhead, profit, insurance, and any other costs associated with the equipment and personnel.

The Contractor shall separate storm-related debris according to classification. Debris types include but are not limited to, vegetative debris, construction, and demolition (C&D) debris, white goods, and metals. The contractor shall load and remove separated debris from the territorial and federal route system right-of-way (ROW) to a debris dumpsite(s) at Estate Body Slob on the island of St. Croix or the grounds adjacent to the National Guard Armory and Eudora Kean High School at Estate Nazareth on the island of St. Thomas, (and/or an alternate site as approved by the Department of Public Works Program Manager).

The Department of Public Works (DPW) Program Manager will designate work sites throughout the island by sector or by roadway sections. Debris will be collected using trucks pre-certified by DPW. Placards provided by DPW will be placed on the trucks so that they are visible and easily read by the tower monitor. Signs will prominently display the following information: Prime Contractor name, Subcontractor name (if applicable), Unique Truck number, Cubic Yard capacity (determined during certification), Name of Inspector, and Inspection date.

NOTE: All mileage is approximated based on the US Virgin Islands' official road map.

The work shall consist of cleaning and removing all "eligible" debris (see section 4 for a definition of eligible debris) from territorial and federal roads, ROW of streets and roads as directed by the Public Works Program Manager. For this contract, the Right-Of-Way (ROW) is defined as the area within ten (10) feet from the edge of the pavement, or the area from the edge of pavement up to a permanent barrier such as a retaining wall – whichever is less. Work will include 1) examining debris to determine whether debris is eligible; 2) separating debris into categories established by the DPW Program; 3) loading separated debris; 4) hauling debris to an approved dump site, and 5) dumping the debris at the dumpsite. Ineligible debris (i.e., hazardous toxic material) will not be loaded, hauled, or dumped under this contract; however, the Contractor must immediately notify the Program Manager when hazardous or toxic waste is found in his sector.

Debris removal shall include all eligible debris found on the ROW within the area designated by the Program Manager. The Program Manager may specify any eligible debris within the ROW which should not be removed, or which should be removed at a later time. The Contractor shall make as many passes through the designated area as required by the Program Manager. The Contractor must receive permission from the Department of Public Works Manager before commencing a subsequent pass. The Contractor shall not move from one designated work area to

another designated work area without prior approval from the Program Manager. Any eligible debris, such as fallen trees, which extends onto the ROW from private property shall be cut to the point where it enters ROW, and that part of the debris which lies within the ROW shall be removed. The Contractor shall not enter onto private property during the performance of this contract.

All debris removal activities must be monitored and verified by assigned Debris Monitors. A debris monitor must be present at each location, from start to finish. The debris monitor will verify that the debris removed is eligible. No debris is to be removed without the approval of the Debris Monitor. All load tickets must be verified by the Debris Monitor, therefore, any debris that has not been approved and verified on the load ticket by the Debris Monitor will be considered ineligible and will not be accepted at the debris collection sites.

All work shall be performed in compliance with the US Department of Transportation Manual on Uniform Traffic Controls for Streets and Highways, Part VI (Standards and Guides for Traffic Control for Street and Highway Construction, Maintenance, Utility, and Incident Management Operations) (MUTCD), and in accordance with the Virgin Islands OSHA Safety Standards.
